

## How old are you?

12 Antworten

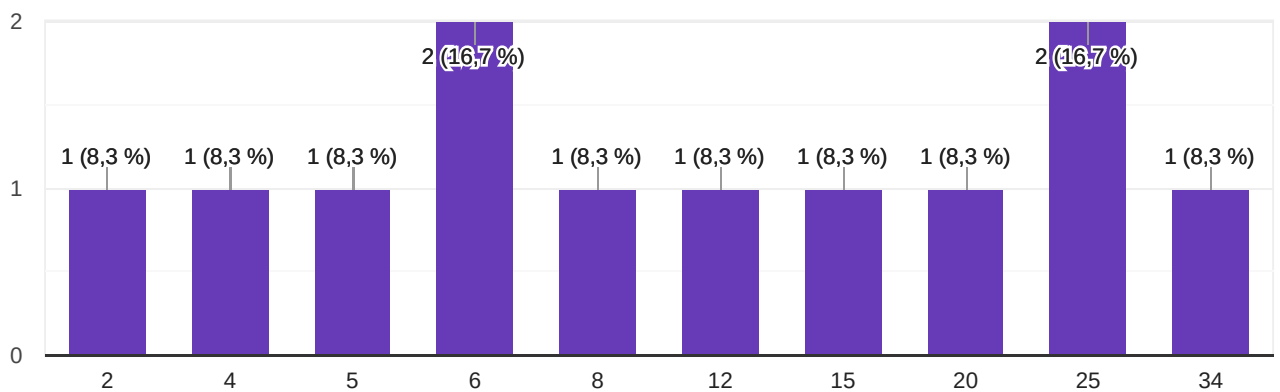

## How many years do you already know agility?

12 Antworten

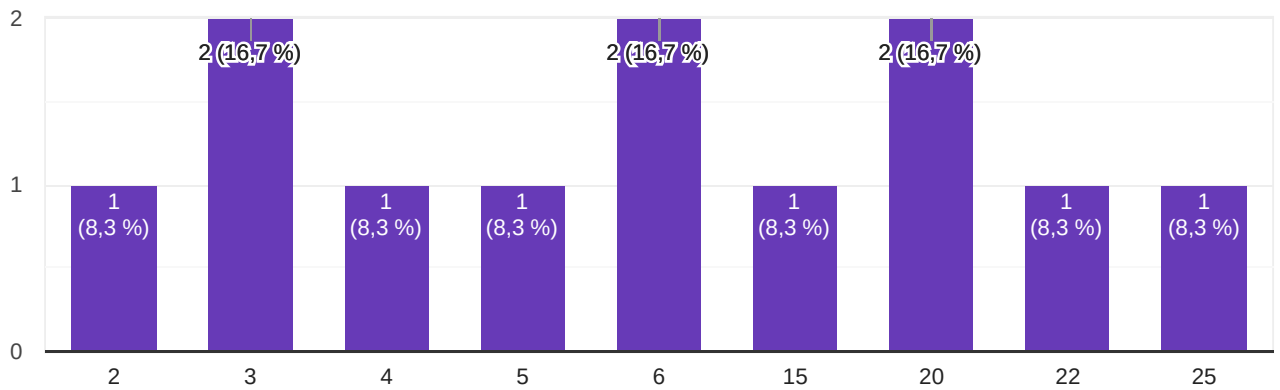

## How many years do you already work in agile organizations?

12 Antworten

How many years do you overall work in agile roles (e.g. Software Developer, Scrum Master, Product Owner, Agile Coach)?

12 Antworten

Please describe in one sentence what agility is for you (if you need more than a sentence, feel free to use multiple lines ;))!

12 Antworten

Supporting people in discovering how to shift into high performance and so be delivering more value, more frequently with more ease and more delight

Continuous and Adaptation

Agility to me is response to change. Change can come anytime in your personal or professional life, how are you reacting to it, accepting it and adopting it that is what agility all about.

The ability to meet the users needs with the flexibility of innovation

Being able to respond effectively to changing circumstances

Degraded to hype an certification scams.

do the right things at the right time and don't stick at a plan

Ability to continuously deploy added value in software systems

Let's say I agree with the manifest. Discovery, by doing, etc

Agile is a verb...

Through iteration make products, one feature at a time

Freedom

## What are your currently biggest challenges with agility?

A focus on installing processes that are identical and chasing agile maturity with no focus on improving delivery or ease.

McKinsey's interpretation of Agile which is so far off the mark it is lethal but appeals to governance functions like finance and execs because it is still high control and allows leaders to still nag everything and keeps

people stuck in a manufacturing mindset of predictability and control.

Human Resources who see people as boxes and roles and agile as an installation and check list

Changing and unclear requirements

My peer scrum masters and my manager don't believe that they need to change.

They are all up to fake agility.

Whole enterprise acceptance

Legacy IT and constrained budgets

See above. And to move organization beyond the Scrum religion.

Getting enterprises doing agile in an effective manner. They tend to follow some courses and make agile a process with too much management on top of it that drains developer resources because of the meetings.

Keep stakeholders on the agile boat

Fake agile, poor engineering practices, poor focus on reducing feedback cycles and achieving business outcomes

The misconceptions that are shown in these kinds of questions.

Standard approach of dumping waterfall projects into scrum sprints

Management

## ...and where could you need help/directions/food for thoughts/impulses?

10 Antworten

Retro

I need help on how to show to others how agile principles helped my team and influence them.

Training leadership and transitioning from non-agile to agile

Nowhere.

Explaining why we are doing agile. Now people think if you are not doing a project with an agile/scrum badge that it is deemed to fail.

(continued) ...and where could you need help/directions/food for thoughts/impulses?

Everywhere in ALM

How to deal with fake agility in the enterprise

You need to read up on agile

I don't need help, I need less project managers and bad scrum masters

How to convince management that conways law is killing them

About which topic would love to visit a talk at a conference?

10 Antworten

Retro

How agile principles helped me and my team. People loose faith in agile within few days, one should believe in it and then only try implementing

Skills to break Work down into small pieces

Devops

I do keynotes and talks myself at conferences, so I see a lot already. I try to avoid agile conferences like the plague.

I'm not a regular visitor of conferences

ALM

Best engineering practices, reducing gaps across skills in software development.

Actual devops and micro teams

Cicd testing real agility

Thank you for paicipating! Anything else you want to get o your chest?

5 Antworten

No

Go Agile

Teams of teams is the hardest part.

Good luck.

what are you going todo with the results?

How can i contact you for discussions or some deeper questions? My honest promise: absolutely no newsle er or adveisement!
